Cybersecurity Services for Tool & Die Manufacturing Company

PROJECT DETAILS

 Cybersecurity

 Apr. 2022

 Less than \$10,000

“

"They offered multiple alternative solutions to suit our budget, allowing us to prioritize how we spent our money."

PROJECT SUMMARY

Vumetric Cybersecurity performed assessed a tool & die manufacturer's website and exposed firewall ports. They then listed all of the system's vulnerabilities and provided cybersecurity recommendations.

PROJECT FEEDBACK

Through their thorough and timely audit, Vumetric Cybersecurity was able to identify risks within the client's system. The team's report was comprehensive and understandable, and their proposed solutions were not only straightforward but also cost-conscious.

The Client

Please describe your company and your position there.

I am IT manager for my company, and one of my responsibilities is smooth functioning of all IT infrastructure and systems.

The Challenge

For what projects/services did your company hire Vumetric Cybersecurity?

We were looking for an external cybersecurity company to perform an annual security audit of our website and firewall. Because we are a part of an automotive supply chain, we must ensure there are no interruptions caused by deficiencies in cybersecurity.

CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 4.0

Would Refer: 5.0

The Approach

How did you select this vendor and what were the deciding factors?

We searched online, sorted out 4 companies, and selected this one based on their reputation, experience and the price.

Describe the project in detail and walk through the stages of the project.

They performed a security audit of our website and externally exposed firewall ports. Upon completion, they delivered a comprehensive report on all of the vulnerabilities and provided a list of security recommendations.

How many resources from the vendor's team worked with you, and what were their positions?

We had a customer experience coordinator and a security analyst.

The Outcome

Can you share any outcomes from the project that demonstrate progress or success?

They were able to identify more risks than we could think of, and proposed straightforward solutions for them.

How effective was the workflow between your team and theirs?

They kept us updated, completed their job within mutually agreed timeframe and their report was easy to read and understand.

What did you find most impressive or unique about this company?

We appreciate that they offered multiple alternative solutions to suit our budget, allowing us to prioritize how we spent our money

Are there any areas for improvement or something they could have done differently?

They did everything as expected, so we did not notice any areas that would need an improvement.
