Cybersecurity Testing for HR Agency

PROJECT DETAILS

 Cybersecurity

 Oct. 2021 - Ongoing

 Less than \$10,000

"They offer a reasonable cost for their services, and they deliver quickly."

PROJECT SUMMARY

Vumetric Cybersecurity is providing cybersecurity testing services to an HR agency to find their app's vulnerabilities. They've also discussed the changes that the client needs to implement on their platform.

PROJECT FEEDBACK

Vumetric Cybersecurity has been able to create remarkable reports for the company, enabling the client to identify what they need to enhance in their app. Their process and professionalism also stand out. In addition, their ability to explain things well is one of their key strengths.

The Client

Introduce your business and what you do there.

I'm the project manager for an HR agency.

The Challenge

What challenge were you trying to address with Vumetric Cybersecurity?

We have a big application and needed help with cybersecurity testing. We used a different company before, but they were expensive and their services weren't good. In addition, the report we received from the previous company wasn't simple to understand – it didn't have the proposition to resolve the problem.

The Approach

What was the scope of their involvement?

Vumetric Cybersecurity does cybersecurity tests for us. So far, they've proposed a solution, and they've been able to report any vulnerabilities that we have. We've also received a big report from them and we've been able to discuss the changes we need to make through a meeting.

What is the team composition?

At first, we worked with a general manager and a specialist. Later on, we began to collaborate with a customer success manager, a senior specialist, and another specialist. Our main point of contact is the customer success manager, and she helped us define the project.

How did you come to work with Vumetric Cybersecurity?

We found them on Google. We had a conversation and decided to work with them.

How much have you invested with them?

We've spent less than \$10,000.

What is the status of this engagement?

We started working together in October 2021, and we continue to collaborate.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

The reports we're receiving from them have been good because it shows exactly what we need to improve in our app and it has a good structure. We also appreciate that they explain the problem first before presenting the solution. Their services have been great, and everything that they do is very secure. Overall, we're happy with their work.

How did Vumetric Cybersecurity perform from a project management standpoint?

Their project management process is good. On top of that, Vumetric Cybersecurity speaks clearly and explains things well; I always understand what they tell me. In addition, they're very professional. We communicate through phone calls, email, Microsoft Teams, and Google Meet.

What did you find most impressive about them?

They offer a reasonable cost for their services, and they deliver quickly.

Do you have any advice for potential customers?

They help you manage your project.
